## NON-GAAP FINANCIAL MEASURES

Global Payments supplements revenues, income and EPS information determined in accordance with U.S. GAAP by providing these measures, and other measures, with certain adjustments (such measures being non-GAAP financial measures) in this document to assist with evaluating our performance. In addition to GAAP measures, management uses these non-GAAP financial measures to focus on the factors the company believes are pertinent to the daily management of our operations. Management believes adjusted net revenue and adjusted net revenue plus network fees more closely reflect the economic benefits to the company's core business and, in the case of adjusted net revenue, allows for better comparisons with industry peers. Management uses these non-GAAP financial measures, together with other metrics, to set goals for and measure the performance of the business and to determine incentive compensation. Adjusted net revenue, adjusted net revenue plus network fees, adjusted operating income, adjusted operating margin, adjusted net income and adjusted EPS should be considered in addition to, and not as substitutes for, revenues, operating income, net income and EPS determined in accordance with GAAP. The non-GAAP financial measures reflect management's judgment of particular items, and may not be comparable to similarly titled measures reported by other companies.

Adjusted net revenue excludes gross-up related payments associated with certain lines of business to reflect economic benefits to the company. On a GAAP basis, these payments are presented gross in both revenues and operating expenses. Adjusted operating income, adjusted net income and adjusted EPS exclude acquisition-related amortization expense, share-based compensation and certain other items specific to each reporting period as more fully described in the accompanying reconciliations in Schedules 6 and 7. Adjusted operating margin is derived by dividing adjusted operating income by adjusted net revenue plus network fees. The tax rate used in determining the net income impact of earnings adjustments is either the jurisdictional statutory rate in effect at the time of the adjustment or the jurisdictional expected annual effective tax rate for the period, depending on the nature and timing of the adjustment.
