

# U.Commerce Central/Dashboard

## Your Campus Commerce Command Center

Managing the complexity of today's campus commerce systems is a daunting task for many Business Offices. So much data must be analyzed, protected, posted, and reconciled. There are so many places where system errors can pop up and so many pay points to monitor. And that's only when campuses are reactive, looking at information after the fact! If they want to be proactive, view trends, and see summaries in real time, it's even more difficult. Fortunately, there's TouchNet's U.Commerce Dashboard.

The vision of unified campus commerce comes to life in the U.Commerce Dashboard. It's the command center for institution-wide financial management. Every transaction, for every merchant in the system, can be tracked and monitored. It brings new accountability, control, and confidence to campus financial management while it transforms the campus Business Office into a technology-driven operations center.

# U.Commerce Central/Dashboard

## Your Campus Commerce Command Center

## Why U.Commerce Dashboard?

- ▶ **Track Business Transactions**  
Keep your finger on the pulse of daily commerce activities campuswide. Review summary reports of daily activity. Drill down into individual transactions to resolve issues and capture details. View transactions by payment method, merchant, and more. Analyze historical data and payment trends.
- ▶ **Merchant Management**  
Analyze transaction summaries by merchant, including breakdown of TouchNet Ready Partner transactions.
- ▶ **View System Exceptions**  
Go to the Dashboard to view system alerts, messages, and notifications. Be proactive in reconciling system exceptions in posting or processing commerce transactions. Think of it as your opportunity to take real-time action for real-time events.
- ▶ **Multi-Campus Support**  
View data cumulatively for all campuses or for a single campus. Set up permissions for administrative access to Dashboard data.
